

ROLLER DRILLS

There's no better way to sow a pasture seed mix. A heavy deep "V" roller ring consolidates the soil and draws in moisture to the bottom of the "V". Simply by broadcasting an even spread of pasture seeds which fall onto that firm moisture zone where they are then lightly covered with soil drawn over them by a following harrow or second roller. It's a perfect environment and a dense weed free sward soon establishes.

"ARD" Roller Drill

SPECIFICATIONS	ARD9VT 9ft (2.7m)	ARD10VT 10ft (3.0m)
Number of Rings	33	37
Ring Type	Deep V	Deep V
Ring Diameter	26"	26"
Row Spacing	72mm (3")	72mm (3")
Sowing Width	9ft (2.7m)	10ft (3.0m)
Width Overall	11ft (3.35m)	12ft (3.6m)
Height Overall	4ft (1.2m)	4ft (1.2m)
Length Overall	10ft (3.0m)	12ft (3.6m)
Weight Empty	2700kgs	3000kgs
Seed Hopper Capacity	380ltr	420ltr

"ECO" Roller Drill

SPECIFICATIONS	EC10C
Ring Type	Cambridge
No of Rings	37
Ring Diameter	26"
Sowing Width	10ft (3.0m)
Overall Width	11ft (3.3m)
Weight Empty	2610kgs
Seed Hopper Capacity	11.10Bu
